EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

2. Claims 1-12 are directed to an allowable product. Since claim 13 has been amended to conform and include all of the limitations of claim 1, the restriction requirement is no longer necessary. Therefore claims 13, 14, 16, 17 and 20-23, directed to the process of making or using the patentable product, previously withdrawn from consideration as a result of a restriction requirement, are now subject to being rejoined. Claims 13, 14, 16, 17 and 20-23 have been hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Since all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, the restriction requirement made in Paper filed March 19, 2004 is hereby withdrawn.

Claims 1-13, 14, 16, 17 and 20-23 are allowed over the prior art of record.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance: the prior art of record does not show an apparatus for passing electrical communication signals over valve control wires having in combination an electronic irrigation controller, a first communications filter circuit coupled to said electrical connection and located in the vicinity of said irrigation control and a second communications filter circuit coupled to said electrical connection and located in the vicinity of where said irrigation fluid is dispersed.
